

# Tuuci warranty

TUUCI constructs its shade structures with the finest marine-grade materials available. We test our products in extreme weather environments to ensure stability, durability and years of worry-free service. In addition, TUUCI personnel carefully follow specific quality control procedures and inspect each product to ensure freedom from any type of manufacturing defect. Our goal is to produce shade platforms that will exceed your expectations and provide a shade experience like non-other in the world. The warranty protection listed below covers manufacturing defects only.

Although all TUUCI marine-grade shade equipment is rigorously tested to withstand incredible forces of nature, and many of TUUCI's shade platforms have been tested in wind conditions which exceed 50 MPH, TUUCI does not recommend or warrant the deployment or use of any collapsible shade equipment in wind conditions which exceed 25 MPH unless and where specifically designated and approved in writing by qualified TUUCI executive and engineering staff members. TUUCI will only warranty products which are properly secured to an adequate base or anchoring system. Further, TUUCI will not cover any damage to a shade or base device which occurs as a result of contact with the ground or any other foreign object including damage which occurs as a result of sudden and severe weather events or other extreme acts of nature. In general, TUUCI recommends that all collapsible shade products be securely closed when not in use.

TUUCI can recommend specific base weight and anchoring systems for specific parasol styles, shapes and sizes, however, TUUCI will only warrant the safe, sensible and reasonable operation of our shade structures within the recommended deployment guidelines. Please contact TUUCI directly if requesting shade devices and anchoring systems which can be warranted in sustained wind conditions which exceed 25 MPH.
