Serengeti Parasols

A range of parasols designed and manufactured to our own specification. Serengeti parasols are fitted with stainless steel brackets that enable easy changing and replacement of any components.

Serengeti

Suitable for both domestic and commercial use, Serengeti parasols are available in a wide range of shapes, sizes and colours to suit most situations. Large rectangular Serengeti parasols are fitted with a scope system to allow them to close over standard tables.

Serengeti Tilt

A number of the Serengeti parasols can be fitted with a stainless steel tilt mechanism to provide flexible shade. This is an easy to use system operated by rotating the canopy.

Canvas

Serengeti parasols are fitted with Teflon coated Dralon acrylic canvas that is water repellent, mould and rot resistant and easily washable. Fabric life is measured in years and can be extended with proper maintenance. To improve the stability of the parasol the canvas incorporates an air vent to release gusts of wind, this air vent is adjustable on all larger models. All wearing surfaces on the canopy are PVC reinforced for extra strength.

Branding

Serengeti parasols are an ideal medium for quality branding. Durable frames can be matched with a wide variety of fabric and print options to create the perfect branded parasol.

Serengeti Lounge

The perfect garden room. A stunning combination of stainless steel and Bangkirai wood, fitted with ample drapes. The Serengeti Lounge is robust and durable, ideal for year round entertaining. The fabric can also be printed with corporate logos.
